Width: 18" / 458 mm

Wall: .25" / 6.35 mm (avg)

Mass: 70 lbs. empty / 653 lbs. filled with 70 gallons of water

Description: The Safety Barrier or portable barricade is a specialty barrier that is superior in strength and quality to the competition. The barriers are designed to remain maintenance free and stay in place. Since they are made with recyclable, UV resistant polyethylene plastic, they won't chip, fade, crumble or spark if struck by a metal object. This barrier, when empty, allows for deployment by just one-two individuals and thus saving the high cost of additional manpower and equipment for set-up. This barrier is also designed to hold a flashing light if desired.
