Wall: .25" / 6.35 mm (avg)

Mass: 100 lbs. empty / 834 lbs. filled with 100 gallons of water / 1250 lbs. filled with sand

Description: The RRM-Safety Barrier or portable barricade is a specialty barrier that is superior in strength and quality to the competition. Our barriers are designed to remain maintenance free and stay in place. This barrier, when empty, allows for deployment of just one-two individuals and thus saving the high cost of additional manpower and equipment for set-up. Our barrier is designed to hold a flashing light if desired. Because our barriers are made with recyclable, UV resistant polyethylene plastic, they won't chip, fade, crumble or spark if struck by a metal object.

Compliance: AASHTO MASH TL-2 - This product has been tested and approved by the US Department of Transportation as a Test Level 2 Longitudinal Channelizing Device.
